Paul Davis National Installs CheckMate Tool & Equipment Management Software

Redmond, Washington/August 2, 2010/ Dynamic Systems, Inc., a leader in mobile data collection applications, announces that Paul Davis National, a large Restoration and Cleaning company, has chosen the CheckMate Toolroom Tracking Solution as their equipment tracking software.

About CheckMate Toolroom Software

CheckMate software increases productivity and saves money by reducing the time it takes to locate equipment and by assuring that items will not be lost or left behind after a job. Based on fast, accurate barcode technology, CheckMate records where the item is, who has it, and when it is due back. The Maintenance Scheduler option records repairs and schedules regular periodic maintenance and records warranty expiration dates. The systems also track vehicle service and registration renewals.

"We are very pleased with how easy CheckMate is to use. We've already seen how much more quickly we can deploy equipment to a job and we expect a significant reduction in losses," stated Craig Kazmierczak, Paul Davis National's CFO. "We have installed CheckMate in 3 of our roving trailers and will be adding the system in another 3 by year end."

About Paul Davis

Paul Davis Restoration, Inc. is a national franchise and leading provider of fire and water damage clean up and restoration, mold removal and remodeling services. Paul Davis National owns five trailers that are deployed to support the franchisees in the case of a major clean up.

About Dynamic Systems

Dynamic Systems has been a national leader in Barcode Tracking Solutions since 1981, providing flexible, complete and configurable programs for: tool and equipment tracking, inventory control, document tracking, fixed asset management, time and attendance, work order tracking and job costing. Barcode Data collection has been proven to be the most accurate and efficient method of tracking/counting items. More can be found regarding software that

support restoration companies. Go to Barcode Solutions or <http://www.a-barcode.com/solutions/?gallerytag=i-restoration>.

"Loss of tools or equipment and damaged or non-working equipment are major overhead costs that can be contained with a well-designed tracking system. Our customers see a typical payback for the CheckMate Equipment and Tool Tracking System within 3-4 months," states Alison Falco, President of Dynamic Systems.
